High end sound is the goal ... and AURUM is the result. It represents technology at its innovative best. Our engineers don't rely on what has been done before, but devote their efforts to pushing the boundaries of what is possible. They search for innovative solutions, and time and again come up with new and revolutionary designs.

The AURUM series is quadral's latest step into the world of pure sound and stunning beauty. They are designed to satisfy even the most discerning musical and visual tastes. Stereo or home theatre, a system can be configured to suit your personal requirements, with front, center, rear and

subwoofer all available in matched setups. AURUM is truly an amazing experience.

The new AURUM world of color: all speakers are designed and manufactured in Germany, with custo-mized lacquered finishes available to meet customer needs.

They are available in standard, satinized or high-gloss form.

CHROMIUM STYLE

... compact giants of sound

For premium sound reproduction of music or films, quadral has developed the four-member CHROMIUM STYLE family of speakers. They impressively show how modern design and outstanding sound can come together beautifully in one series. Whether bookshelf, center, fronts or subwoofer, all CHROMIUM STYLE speakers boast exceptional detail resolution, frequency range and dynamics ... optimized for music or surround sound.

All CHROMIUM STYLE speakers come in a choice of high-gloss black or high-gloss white.

OUTSTANDIG
areadvd.de 10/2008 (Germany)

Musicality, clarity and distortion-free dynamics throughout the entire tonal range – regardless of whether it is delicate classical music, driving rock or powerful movie soundtracks. Stereo listening becomes a very special experience. And thanks to their homogenous system design, the speakers in the RHODIUM series deliver superb cinema-like sound in a home theatre setup.

Highlight in the treble range

quadral's new next-generation Super-Audio tweeter ensures crystal-clear sound right up into the very highest trebles. The resultant fine resolution up to 46.000 Hz means that the RHODIUM speakers meet ever the very latest audio standards.

ARGENTUM

... the summit of sound quality

Well designed details make for guaranteed listening pleasure, with matching sonic and visual quality. Discover favourite sounds all over again, thanks to ARGENTUM. Enjoy music as it was meant to be enjoyed, be it the silky sound of a concert violin, the crisp riffs of a rock guitar or the hypnotic beat of a techno album. ARGENTUM can always be relied upon to deliver the best sound, in pure stereo or surround.

45.000 Hz Super Audio Tweeter

quadral's super-audio tweeter made for finely contoured highlights in the trebles. The sound-damping material behind the fabric dome ensures that reflections from the rear have no effect on the diaphragm. But the really special feature lies in the extremely compact diaphragm mass which enables a cut-off frequency of 45.000 Hz. The fine tonal definition thus made possible meets the standards called for by the modern SACD and audio DVD.

AMUN X

SHOGUN X

AMUN X

With the AMUN X, we stay true to our design standards. Modern and timeless form, the greatest possible care in workmanship, and the top-class technology of our AURUM series bring fine sound quality to this 3-way floorstanding speaker. Despite its slender shape, the speaker combines tried-and-true AURUM technology with the newest PC-based bandpass integration to achieve superior performance in the deep ranges through a powerful 18 cm long-stroke driver. Thanks to a generously dimensioned motor together with a high-strength aluminium membrane, a nimble chassis provides smooth naturalness to the voices.

The freely oscillating membrane of the aluminium dome plays up to 46 KHz in the high range, thereby meeting the demands of high-resolution sound formats. Outstanding quality of workmanship is also reflected in the intricate, low-resonance genuine wood-veneer housing with a baffle thickness of 25 mm.

SHOGUN X OUTSTANDING

Stereo floorstanding-speaker lower middle class
areadvd.de 25.11.2010 (Germany)

SHOGUN X

A timeless classic with an outstanding heritage. The tenth SHOGUN is distinctive by its new mid/bass driver made of titanium-coated polypropylene membrane. Two powerful, newly developed long-stroke woofers with strong magnets and above-average sized membrane surfaces provide phenomenal bass dynamics with a simultaneous low-THD linear frequency range.

QUINTAS

QUINTAS 6000

QUINTAS 5000

The appealing design and flawless craftsmanship of quadral's QUINTAS 6000 and 5000 surround set pleases the eye, while the speakers' effervescent dynamics and tonal balance bring pure listening enjoyment. Frugal listeners get an ideal combination of high-quality music and film soundtrack reproduction. The set's full-grown upright speakers produce respectable bass volume, so you can dispense with an additional subwoofer. The central speaker boasts impressive speech intelligibility and acoustically neutral music reproduction, while the rear satellites provide a spectacular surround effect.

SUB 88 DV aktiv

SUB 63 aktiv

SUB 63 aktiv, ARGENTUM 330, 320, 310 BASE
OUTSTANDING Loudspeaker system 5.1 lower middle class
areadvd.de 01/2011 (Germany)

Perfect your listening enjoyment. The rich strokes of a double bass, the wrath full rumble of a storm and the crack of thunder – often it's not until you use a subwoofer that these become a true sonic experience. Getting those long low-frequency sound waves oscillating optimally calls for targeted development of speaker diaphragms, cabinets, electronics and, of course, their optimum interaction. Subwoofers take the strain off your other speakers, enabling them to concentrate fully on the high to low-midrange. Active subwoofers offer additional support via an integrated end stage.

SUB 700 DV aktiv, PLATINUM M5, M2, M1 BASE
TOP CLASS Testresult: **OUTSTANDING**
HEIMKINO December 2009 (Germany)
